

ÜBERFISH 2

The 10'2" Uberfish 2 is the second generation Uber Fish. It features a new rocker profile that blends an easy glide with a relaxed entry; this gets the board in the wave early giving you plenty of time to set up a solid bottom turn and glide down the line effortlessly.

The new template pulls in and foils out the nose for a tighter turning radius and a low swing weight, which makes the board feel alive off the bottom. Add to that the cleanly foiled and thinned double wing swallowtail and you know that the board will both hold in the pocket and lay over responsibly on your cutback.

The Uberfish 2 works just as well in the surf as it does on flat water a great all rounder anyone can ride.
