

Forgiving yet still performance based, the Quickshift is easy on the eye and even easier to ride. An all-rounder that's designed to perform at the local beach break right through to the most serious reef break, the Quickshift is the perfect alternative to the high performance models.

The full outline through the front half of the board adds stability while the subtle entry rocker and flipped nose lets you confidently paddle into steeper waves with ease. The slightly narrower tail outline and smooth exit curve allows the board to maintain control and manoeuvrability in critical situations and at high speeds, while still maintaining a level of sensitivity in smaller waves.

The versatility of the Quickshift is further enhanced with a tri-quad fin configuration allowing it to be set up as a thruster or a quad to customize its performance.

Single/Double

Neutral Rail

2-7ft Waves

Intermediate - Advanced

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
6'0"	19 1/4"	2 3/8"	28 ltr	FCS M5	0-154lbs (0-70kg)
6'2"	19 3/8"	2 3/8"	30 ltr	FCS M5	165lbs (75kg)
