

FISH

We have taken one of our favourite and most versatile performance fish shapes and built it using E2 epoxy technology to increase the durability and add value. The Fish is a versatile, forgiving performance shape that you won't grow out of. By demand, we have added a new larger 6'6" to the range for 2011.

The Fish's low entry rocker design with a single concave and thruster fin configuration are all performance. The multilayer micro sandwich, seamless epoxy layup is one of our most advanced and tough construction methods.

The Fish is a fun, durable travel package that will allow you to travel anywhere in the world and have a great time once you arrive.

Single Concave

Neutral Rail

1-5ft Waves

Intermediate

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
5'6"	19 3/4"	2 1/8"	33 ltr	FCS M3	0-132lbs (0-60kg)
6'0"	20 7/16"	2 3/8"	36 ltr	FCS M3	143lbs (65kg)
