

MEGA MAGIC

The Mega Magic is one of the most popular Longboards currently available in the USA. Design inspiration drawn from many larger Tandem and SUP boards.

The volume removed from the length and redistributed it to the width and thickness while maintaining performance. It is about 1/2-3/4" thicker and 1-2" wider than a standard longboard, the Mega Magic will float like a board that is 12-18" longer. For example the bigger guy that normally rides a 10' - with the Mega he can ride a 8'-9' without giving up float or stability.

The Mega Magic features the Magic bottom contours and rocker profiles allowing you to push this board to it's limits. Riding this board almost feels like cheating because of the unfair advantage you have over others in the line up.
